PROFESSIONAL SUMMARY

PMP®-certified Industrial Engineer in supply chain, procurement and planning. I manage purchase requisitions and material planning for 350+ SKUs a month across concurrent projects at Energy Tracks, and I build Excel tools that make purchase tracking faster and clearer. Background in industrial operations, product design and AI-assisted tool building.

PROFESSIONAL EXPERIENCE

Supply Chain & Planning Engineer — Energy Tracks

Riyadh, Saudi Arabia | July 2026 – Present

- Manage 50+ purchase requisitions a month across concurrent projects in Excel and Odoo ERP, tracking order status and outstanding quantities.
- Plan material requirements for 350+ SKUs a month for project builds and general stock, aligning deliveries with production schedules.

Industrial Engineering Intern — Al Safi Danone

Al Kharj, Saudi Arabia | June 2025 – August 2025

- Supported daily warehousing operations, including receiving, storage layout, and stock control across a high-volume dairy distribution site.
- Analyzed safety stock levels and consumption data in Microsoft Excel to strengthen inventory planning accuracy.

Teaching and Academic Coordinator — Alfaisal University Enrichment Program

Riyadh, Saudi Arabia | June 2024 – July 2024

- Coordinated academic sessions, schedules, and activities for 100+ students in a summer enrichment program.
- Supervised a student capstone project on suicidal-ideation detection that won 1st place at the closing showcase.

PROJECTS

Supply Chain Control System | Excel

- Tracks 2,300+ PO lines from request to delivery, linking each item to its invoice so nothing falls between steps.
- Daily status reports and a live dashboard show what is open, received and invoiced, replacing manual follow-up.

Supplier Scorecard | Excel

- Live scorecard of 70+ suppliers: pick any one to see its spend, items received and real delivery days.
- Combines PO and cash purchases in one view, giving a clear basis for supplier decisions.

VeriGate | IoT-Based Inventory Receiving Device — Alfaisal University

- Built an IoT receiving system using Arduino, RFID, and a dashboard database to verify driver identity and shipment data at receiving gates.
- Aims to reduce manual data entry, human error, and driver waiting time while improving record traceability in receiving operations.

HydraCap | Bottle Cap with Integrated Medication Compartment

- Developed a product concept combining a water bottle and pill compartment to simplify daily medication use.
- Ran concept generation, design evaluation, material selection, and prototyping analysis to compare two integration approaches.

EDUCATION

Bachelor of Industrial Engineering — Alfaisal University

Riyadh, Saudi Arabia | 2026 | Track: Digital Design & Manufacturing

CERTIFICATIONS

- Project Management Professional (PMP)®, Project Management Institute, 2026 | Credential ID: 4563576
- Certified Associate in Project Management (CAPM)®, Project Management Institute, 2026 | Credential ID: 4503012
- Lean Six Sigma Yellow Belt, KnowWare International, 2026
- Saudi Council of Engineers (SCE) Membership, 2026 | Membership ID: 1265151
- Mastering Financial Management, Coursera, 2025 | Credential ID: E6BLT8IO1QVN

SKILLS

Technical: Internet of Things (IoT), Arduino, SolidWorks, Excel VBA, Power BI, Front-End Design, Microsoft Office, Odoo ERP, Microtec, Claude AI

Engineering & Operations: Supply Chain, Procurement, Supplier Evaluation, Material Planning (MRP), Warehouse Operations, Process Improvement

Project & Professional: Agile and Waterfall Project Management, Problem Solving, Time Management, Leadership, Cross-Functional Coordination

LANGUAGES

Arabic (Native), English (STEP: 83), Spanish (Duolingo, A1)
